Ans to the Q.No: 1

```
# include <bits/stdc++.h>

using namespace std;

Class Node
{ public:

int val;

Node *next;

No de (int data)

{
    val = data;
    next = NULL;
};

void ~~Searc~~ delete recursive (int searchvalue, node

{
    Node *temp = head, *temp 1;

    for (int i = 1 ; i < Searchvalue ; i++)

    { if ( temp → val % 2 != 0) {
```

```
            temp1 = temp ;
            temp = temp→next ;
    }
        temp 1 → next = temp → next;

        delete  temp ;

    }
else
        deleterecunsive (int  seruchvalue);

    }

int  main ()

{
    Node" newnode = new Node();

    delete reeunsive (2, head);
        "               (4, head);

    }
```
